

Product Name:	QuaCell® CellBest 007 Feed Medium
Cat. No.	A11907
Amount:	Set
Formulation:	Liquid
Storage:	2~8°C
Validity period:	12 months (Validity period on product packaging)

Description

QuaCell® CellBest 007 Feed Medium supplements amino acids, vitamins, salts, trace elements and glucose. CellBest 007A is designed to support modern production processes with animal component-free, chemically defined, and no growth factors, peptides, hydrolysates, or phenol red. CellBest 007B is an amino acid concentrate. CellBest 007A and 007B are concentrated cell culture supplements that are used in combination to increase protein production. The product has strong versatility and can be used with any basal medium on the market.

Components

L-glutamine	No
Glucose	77.00g/L
Hypoxanthine & Thymidine	No
Phenol red	No
Sodium bicarbonate	No
Hydrolysate	No

The product consists of three components

#A11907A	QuaCell® CellBest 007A Feed Medium	1000mL
#A11957	QuaCell® CellBest 007B Feed Medium	100mL

Please use together following the User Manual.

Product Intended Use

Use aseptic technique when handling or supplementing this medium. This product is for research or further manufacturing use. CAUTION: Not for human or animal therapeutic use. Uses beyond the prescribed limits may violate local law.

Safety information

Read the Material Safety Data Sheets (MSDS) and follow the handling instructions. Wear appropriate protective eyewear, clothing, and gloves

Preparation Instructions

Preparation method

- Use QuaCell® CellBest 007 Feed Medium under sterile condition.
- Use with QuaCell® CHO CD Medium.
- Antibiotics are not recommended.
- The unused media after opening should be sub package, Use sealing film to seal, In 2 ~ 8°C avoid light preservation.

Fed-batch culture advice

1. Feeding strategy

	D3	D5	D7	D9	D11	D13
CellBest 007A	4%	4%	4%	4%	4%	4%
CellBest 007B	0.4%	0.4%	0.4%	0.4%	0.4%	0.4%

2. The feeding strategy and feeding time can be adjusted according to the density and cell growth.

If the project already has a mature cultivation process, it is suggested to refer to the original process. If the process is in the development stage, it is suggested to use DOE method to determine the appropriate cultivation parameters in order to obtain better results.
